

Hands-on curriculum-aligned workshops & resources to promote proactive environmental outcomes

Preschool, primary & community workshops

Sydney hosts over 200 native bee species vital for pollination and ecosystem function. Students make insect hotels, view local invertebrates & interact with amazing models.

*'This program has broad reaching benefits including real world application of syllabus outcomes and deeper long term influence on sustainable approaches to living and conserving the living world'*

*Catherine Judd, Community & Education Programs Coordinator, Royal Botanic Garden Sydney.*

Explore the roles, adaptations & needs of over 340 Aussie species united in their need for a tree hollow. Students make a nest boxes for a range of species! Based on the award winning book 'A Hollow is Home' by Abbie Mitchell (CSIRO)
